

# Peter Imoh Victor

## Senior Software Engineer

[Abuja, Nigeria](#) | [imoh.dev](#) | [github.com/peterimoh](#) | [me@imoh.dev](#) | [+2349072193891](#) | [linkedin.com/in/peterimoh](#)

Trailblazing senior software engineer with 6+ years of experience in crafting cutting-edge web and mobile solutions. Proven ability to lead development teams, mentor junior engineers, and deliver high-quality software using JavaScript, PHP, and Dart. Passionate about building robust, scalable applications and fostering a collaborative developer ecosystem.

---

## Professional Experiences

### Lead Developer

**Gilgal Dabihn | July 2023 - August 2024 | JavaScript, PHP, NodeJS, ExpressJS, EJS, Jest, Bootstrap, React, React Native, Material UI, Webpack, SSO, Modular Federation, AWS, CI/CD.**

- Drove the creation of a comprehensive platform that seamlessly integrates agricultural technology with e-commerce capabilities.
- Cultivated a cohesive team of developers, UI/UX designers, and QA testers, fostering a collaborative environment that resulted in efficient and successful project delivery.
- Architected and implemented robust backend solutions leveraging JavaScript, Node.js, Express.js and EJS to deliver exceptional performance, reliability, and security.
- Developed scalable Rest APIs using Express.js and Swagger ( openapi ).
- Fostered a culture of continuous improvement by mentoring team members, conducting thorough code reviews, and implementing industry best practices, resulting in significantly enhanced code quality and team productivity.

- Successfully bridged the gap between product development and business objectives, delivering high-impact solutions that exceeded expectations.

## **Senior Frontend Developer**

**Gilgal Dabihh | July 2022 - July 2023 | JavaScript, React, Material UI, Webpack, SSO, Modular Federation.**

- Meticulously converted design mockups into precise and visually accurate code, ensuring pixel-perfect replication of the design system.
- Demonstrated expertise in selecting appropriate integration methods, implementing robust authentication and authorization mechanisms, and optimizing API calls for efficiency.
- Led planning sessions and engaged in peer programming to guide and support junior developers, facilitating knowledge transfer and skill development.
- Developed and implemented comprehensive coding standards and best practices to enhance code readability, maintainability, and overall project quality.

## **Software Engineer**

**Watson Psychological Health Center | February 2024 - May 2024 | JavaScript, NodeJS, ExpressJS, EJS, React, React Query, TailwindCSS, CI/CD, Twilio, SendGrid.**

- Oversaw the design, development, and optimization of a robust healthcare system, ensuring strict adherence to HIPAA compliance while delivering exceptional performance and scalability.
- Constructed detailed, high-fidelity wireframes that effectively communicated design concepts and met stakeholder expectations.
- Developed and executed a comprehensive data security strategy to mitigate risks and safeguard sensitive patient records.
- Developed scalable Rest APIs using Express.js and Swagger ( openapi ).
- Saved time by integrating a third party appointment scheduling system (Calendly) into the system to allow Client interface with his patients.

- Integrated a logging system to track activities in the system
- Trained the Stakeholders and its employer on how to manage patient informations

## **Senior Frontend Engineer**

**Consulting Stream Technology | July 2022 - May 2024 | JavaScript, NodeJS, Kibana, Grafana, ElasticSearch, React, React Query, TailwindCSS, Material UI, Ant Design, Nx, Storybook, OpenAPI.**

- Played a pivotal role in the planning, design, and development of enterprise-grade systems for various industries, working alongside a team of seasoned engineers.
- Designed and implemented the frontend architecture for a complex security and reporting system, meeting the stringent requirements of an apex bank.
- Engineered and implemented sophisticated monitoring modules to enhance the operational capabilities of security parastatals.
- Developed custom Kibana plugins to provide in-depth analytics capabilities, meeting specific client requirements.
- Pioneered efficiency improvements with Git Version Control, React.js, and Material UI, increasing team productivity by 35%.
- Spearheaded the planning and architecture of large-scale frontend systems, implementing robust design systems and leveraging Nx monorepos to optimize development efficiency.
- Employed comprehensive unit and functional testing methodologies to guarantee consistent and timely feature delivery aligned with stakeholder expectations.

## **Senior Frontend Developer**

**Xische & Co | November 2023 - February 2024 | JavaScript, React, NextJS, SCSS.**

- Partnered with a frontend developer to design and implement a state-of-the-art frontend system, meeting the specific needs of the stakeholder.
- Following the component-based approach to develop large frontend applications.
- Improving website speed and responsiveness through code optimization and performance profiling.
- Ensuring applications are accessible to users with disabilities by following WCAG guidelines.
- Working with designers, backend developers, and other team members.

## **Mobile Developer**

**Vidor | June 2022 - August 2022 | JavaScript, React, React Native, AWS Amplify.**

- Crafted efficient and scalable React Native application, tested for both IOS and Android, contributing to the development of a robust fintech solution.
- Aligned technology strategies with organizational goals, driving digital transformation initiatives.
- Optimized application speed and performance by implementing strategic image compression, JavaScript bundle minification, and effective caching mechanisms, resulting in dramatically improved load times and a superior user experience.

## **Software Engineer**

**NauNauSOS | March 2022 - June 2022 | JavaScript, React, React Native, Expo, NodeJS, ExpressJS, Postgres, Sentry.**

- Collaborated with a frontend engineer to full-proof a React Native Expo application (<https://naunausosapp.com>).
- Enhanced application stability by systematically identifying and resolving all existing bugs, establishing a robust unit testing framework for both

frontend and backend, and implementing advanced error reporting with Sentry.

- Contributed to architectural decisions and system design, ensuring scalability and maintainability.

## **Frontend Developer**

**This.is.Afrikan | May 2021 - January 2022 | JavaScript, React, MailChimp, Shopify, Shopify Storefront, Firebase, Stripe, DHL, Heroku.**

- Architected and developed a comprehensive e-commerce application utilizing Shopify's Storefront API to efficiently manage product catalogs, inventory levels, categorization, and order processing.
- Optimized order processing and delivery by integrating DHL shipping services, providing customers with real-time tracking and efficient order fulfillment.
- Optimized deployment efficiency and reduced time-to-market by implementing a continuous integration and deployment workflow targeting Heroku.
- Effectively maintained existing system functionality while successfully implementing new features that directly addressed stakeholder requirements and business objectives.

## **Chief Technology Officer**

**Zlidee Food Marketplace | August 2019 - December 2020 | WordPress, JavaScript, JQuery, PHP, Plugin Customization, Web Servers, React, Redux.**

- Successfully delivered a scalable and flexible multi-tenant solution by effectively utilizing WordPress's core functionalities and extending its capabilities through custom plugin development.
- Implemented comprehensive SEO strategies to enhance website visibility, improve search engine rankings, and drive organic traffic.

- Successfully employed cutting-edge technologies to convert the existing web application into a high-performance mobile application compatible with both iOS and Android platforms, expanding the application's reach and user base.
- Implemented and enforced stringent security protocols to safeguard systems and data from vulnerabilities and threats.

## **Junior Software Developer**

**Zlidee Food Marketplace | April 2019 - August 2019 | WordPress, PHP, JavaScript, JQuery.**

- Utilized WordPress Gutenberg's block-based editor to construct dynamic and customizable ecommerce pages, enhancing design flexibility and content management efficiency.
  - Designed and implemented a range of website widgets to provide tailored features and improve user experience.
  - Identified and resolved various technical issues and bugs in WordPress sites, including compatibility problems with themes and plugins, ensuring smooth and error-free website operation.
- 

## **Community Contributions**

### **Mentor and Technical Lead**

**TechPEM Nigeria | June 2023 - Present | Backend Track**

- Cultivated a culture of continuous learning by leading knowledge-sharing initiatives and empowering team members to stay updated on industry trends.
- Provided mentorship and career guidance to aspiring and junior developers, fostering their professional growth and skill enhancement.

## **Get Skilled Afrique | October 11th -13th, 2021 | Techgirl Summit**

- Championed women's advancement by providing platforms for knowledge sharing and career development within the tech ecosystem.
- Contributed to closing the gender gap in tech by providing women with actionable insights and resources.

## **Volunteer**

### **PSIFON Org | May 2021 - Present | Software Engineer**

- Leveraged expertise to coach and mentor individuals, fostering their growth and development in software engineering.
- 

## **Open-Source Projects**

### **FreeCodeCamp**

#### **Developer | May 2021 - April 2023**

- Effectively identified, diagnosed, and resolved system bugs to improve application performance and user experience.
  - [Github Repository](#)
- 

## **Skills**

- **Languages:** HTML, CSS, JavaScript, TypeScript, PHP, Dart, Go.

- **Frameworks:** Node.js, Laravel, Gin-gonic, React.js, Alpine.js, Next.js, Astro, JQuery, Adonis.js, Angular, HTMX, Tailwind CSS, Bootstrap, WordPress, Ant Design, Semantic UI, Apollo Client, Apollo Server.
  - **Databases:** MySQL, PostgreSQL, SQLite, Firebase, MongoDB, Redis.
  - **Tools:** GraphQL, Linux, OpenAPI/Swagger, Docker, Kibana, ElasticSearch, AWS, JSON:API, CPanel, BullMQ, Vite, Webpack, Rollup, Git, Github, Nx, Grafana, WebSocket, Digital Ocean.
  - **Methodologies:** Agile, Scrum, Test-Driven Development (TDD).
  - **Soft Skills:** Time Management, Leadership, Critical Thinking, Collaboration, Attention To Details, Communication, Adaptability, Creativity, Problem Solving, & Accountability.
- 

## Education & Certifications

- **Bachelor of Science in Applied Geophysics**, University of Calabar, Calabar, Nigeria 2018
  - **JavaScript Algorithms and Data Structures**, freeCodeCamp, 2018.
  - **Responsive Web Design**, freeCodeCamp, 2018.
